

## **Journal of Space Philosophy Sponsors**

**By JSP Editors**

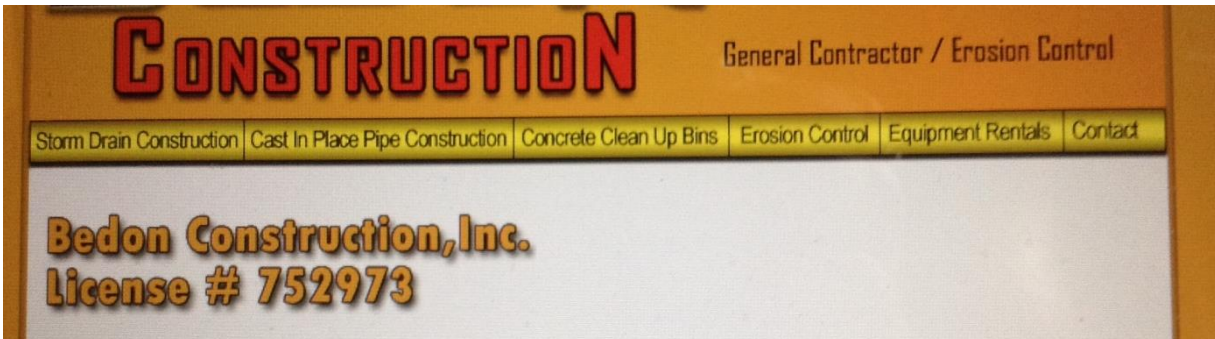

The Board of Directors of the Kepler Space Institute recognizes the generous donations of the following companies and individual to finance the Journal of Space Philosophy:

- Bedon Inc., Construction Company, Temecula, California, Don Parker, President
- Automotive Repair, Singapore, Hosain Bahari, President
- Dr. Sherry Bell
- Dr. Bob Krone and Salena Gregory Krone
- Smart Fleet, Inc. Joseph Sobodowski, CEO.

See information in the following pages

Temecula, California, Don Parker, President**

### CAST-IN-PLACE PIPE (CIPP)

At 30 plus years, Cast-In-Place Pipe (cipp) technology is a viable pipe-laying process that enables Bedon Construction to install storm drain pipe at considerable cost savings over traditional methods, Cost savings average 25-50% compared to precast pipe.

We own all the equipment necessary to pour 24" to 120" pipe. We have experienced personnel on staff to construct your pipeline quickly so that your project can be completed with both time and cost savings.

Our staff civil engineer can work with your engineers and the public agencies to prepare your plans for the use of Cast-In-place Pipe.

CAST-IN-PLACE specifications Pipe Dia. Wall Thickness Normal Yield bucket Width Min Radius For curves Pipe Zone Spoils.

A photograph showing a yellow construction truck equipped with a large pipe-laying machine. The machine is positioned in a long, narrow trench that has been dug into the ground. The truck is actively pouring a material into the trench, which is forming a large, flexible pipe. The surrounding area is a flat, dirt-covered construction site under a clear sky.
